

# *The Proofs of Hylozoics*

<sup>4</sup>There are five proofs, for those who need them, of the correctness of hylozoics (its agreement with reality), each one of them by itself wholly sufficient, being of matchless logical tenability. These five are:

the logical proof,  
the proof by explanation,  
the proof by prediction,  
the proof by clairvoyance,  
the experimental proof.

<sup>5</sup>The logical proof consists in showing that hylozoics constitutes a non-contradictory and irrefutable system of thought and, as such, cannot be constructed by the human intellect nor without a knowledge of reality. It can never come in conflict with facts definitively ascertained by science. All new facts will find their places in it. The more research advances, the more obvious it will be that hylozoics is the only tenable working hypothesis. At mankind's present stage of development it cannot be anything else for most people.

<sup>6</sup>The proof by explanation: Hylozoics provides the simplest, most unitary, most general, non-contradictory and irrefutable explanation of thousands of facts otherwise completely inexplicable.
