2“There are in Greek science many ideas that are true inklings of discoveries that have been made by modern physicists.” What a grand admission! But of course it cannot have been more than “inklings”. Why are there no such “inklings” in modern science? When will these know-alls grasp that it was secret knowledge? What do they know of the hylozoic epoch in Greek thought?

Book: Cosmic Intelligence 7.6

The Fifth RayThe fifth ray concerns itself with the building of form, with the utilization of matter, with the embodying of ideas, or of entities, whether cosmic, solar systemic, planetary, human, or subhuman. The fifth ray promotes mental understanding of esoterics, the first self's (47:5-7) most important understanding. www.hylozoik.se
